Riverfront Project

- Stewardship Grant accepted by City Council for the upland trails for the River Park
- The permit applications for the River Park were submitted on March 28
- LAWCON grant will be finalized when the River Park is permitted
- Tentatively awarded $225,000 WDNR Municipal Flood Control grant for the mill pond restoration
- Strand is currently working on the restoration engineering which includes a soil management plan
- Mason Lacy from REP will be giving a design update at the next steering committee meeting
- The EDA ARPA grant status is still currently unknown. The EDA staff member we have been working with said they are behind schedule.
- We submitted another WDNR Outdoor Aid grant application for phase III of the project (Mandt Park river corridor or phase I of the master plan).

Virgin Lake Trail Project

- We had our kick-off meeting with MSA on 4/28
- New trail lighting at road crossings where there currently isn't any
- Includes the extension from Roby Rd north to the 51 West development
- We are looking at widening the trail to 10' where possible. We will know more when the survey is completed.
- I plan on applying for a DOT TAP grant for this project in June

51 West Park Master Plans

- We had our kick-off meeting with MSA on 4/28
- The first step in the public input process is a community survey. There will also be stakeholder meetings (neighbors, developer, RTTF?), a pop-up booth at the Taste of Stoughton, and a public meeting.
- Based on the current housing units, we will have $937,425 in park facility fees to develop the new parks.

KPW Master Plan

- This is on hold until the next phase is approved which includes additional parkland.

Division St Park Shoreline Repair

- The repair should start within the next couple of weeks. Public Works is going to mow (scalp) the area that needs to be repaired and the consultant will start the repair process.
