22' FRONTAGE

Fahrenheit 364 – 364 E. Main St, Stoughton, WI - Proposed Outdoor Seating Area

The width of my building is approx. 22 feet, and from the building to the curb is approximately 16 feet. There is room for 4 tables, 2 42" rounds with four seats each, and 2 31" rounds with two seats each, allowing for a total of 12 customers in the outside area. 1 server will only be outside at a time as to limit the interactions and the amount of people in the area at one time. Two of the tables will be on either side of the entrance and should not occupy more than 5' 6" from the front of the building and not more than 5' 6"from the curb which will allow a 5' right of way for the side walk.

All tables will also have at least 6 ft in between all the customers adhering to the regulations set forth in the guidelines for bars and restaurants by the Public Health Department of Dane County. According to the guidelines there are no restrictions on the number of patrons in the outdoor areas as long as the 6 ft distance is followed, so all 12 seats can be filled. Also, with a maximum table of 4, there will be no tables of more than 6 people, which also follows the guidelines for all Phases of reopening. In addition, all patrons will need to check in with a staff member to sit outside so that we may make sure all of the rules are being followed.
