Neighbors of Virgin Lake Park,

The City has partnered with a local volunteer group to install a boardwalk and trail at Virgin Lake Park. The volunteer group was able to receive a grant for the volunteerism in conservation that covered the cost of this project. Installing the board walk will require a few days of work which will entail cutting boards on site, placing the frame of the boardwalk in place, and tree trimming on the western edge of the trail. No dates for the install have been set at the moment since we are waiting for the area to dry out.

The boardwalk will use recycled Ash wood that is local to Stoughton and dried in a solar kiln. The area where the trail and boardwalk are is considered a wetland which means that the boardwalk has been designed so it is not attached to the ground and the trail will need to be mowed with no surface. We anticipate being able to get a mower to the area for most of the summer. It may be possible in the future to extend or change the route of the trail since the boardwalk is modular. Below is a map of the new trail. Please let me know if you have any concerns. You can reach me at 873-6746 or dglynn@ci.stoughton.wi.us.
