Attachment #17: JRB Final Meeting Minutes on TID #5

1 Introduction

This project plan has been compiled to create Tax Increment District #5 (TID #5) and amend the boundary of Redevelopment Area #1 (RA #1) in the City of Stoughton. It has been prepared in compliance with Wisconsin Statutes Chapter 66.1105(4)(f) and 66.1331(10). The plan establishes a need for the district, the proposed improvements within the district, an estimated time schedule, and an estimated budget. The plan also includes a detailed description of the Tax Increment District (TID) and boundaries. The boundary of RA #1 has been amended to follow the newly created boundary of TID #5. RA #1 is a redevelopment project area for exercising the power of the Redevelopment Authority (RDA) as defined in 66.1331(3)(h). The original Redevelopment Area Project Plan, adopted by the City Council on March 25, 2008, will still serve as the redevelopment plan required to be prepared by an RDA in 66.1331(3)(Lm).

Approval Process

The Stoughton City Council met on July 28, 2009 and directed the RDA to prepare a draft project plan and boundary to create TID #5 and amend RA #1. The City Council also authorized the formation of a Joint Review Board (JRB) at that time. The City of Stoughton RDA is authorized to prepare the plans necessary to carry out a plan of redevelopment within TID #5. The City Council passed a resolution declaring the original Redevelopment Area blighted on March 11, 2008. The original boundary area was found to be 56.08% blighted. No blighted parcels are being brought in with the amended RA #1 boundary; the percentage of blighted properties after the boundary amendment is 52.25%.

At their December 10, 2009 meeting, the RDA scheduled a public hearing for January 27, 2010. A draft project plan was reviewed by the Redevelopment Authority on December 23, 2009. As a result of the discussion, revisions to the plan were made. Notice of the Public Hearing was sent to the overlying taxing jurisdictions on December 28, 2009. An informational presentation to the Plan Commission was held on January 11, 2010. The Plan Commission found that the Project Plan complies with the City's Comprehensive Plan at that meeting.

The Joint Review Board (JRB) held its first meeting to discuss TID #5 on December 7, 2009, and an additional meeting to discuss the TID on January 29, 2010. Laurie Sullivan was voted chair of the JRB, and Dave Phillips was voted at-large representative. A Public Hearing was held on the TID #5 boundary, project plan and RA #1 amendment on January 27, 2010. Notice of the public hearing was published on January 7, 2010 and January 14, 2010. The RDA approved the TID #5 boundary and project plan and the RA#1 boundary amendment following the public hearing and recommended it to the City Council for adoption.

The RA#1 amendment and the project plan for TID #5 was adopted by resolution of the City Council on February 23, 2010. The Joint Review Board met on _____, 2010 to approve the City Council Resolution creating TID #5. Documentation of all resolutions, notices and minutes can be found as attachments to this project plan.

As required by Wisconsin Statutes Chapter 66.1105(5)(b), a copy of the project plan will be submitted to the Wisconsin Department of Revenue and used as the basis for the certification of Tax Increment District #5 in the City of Stoughton.

This is to be used as the official plan that guides redevelopment activities within the TID #5 boundary. The Redevelopment Plan adopted by the City Council on March 25, 2008 remains

the official redevelopment plan for RA #1, with the exception of the boundary amendment contained within this Plan. Also, the March 24, 2009 Rail Corridor Neighborhood Plan should be consulted prior to redevelopment within the area.

Implementation of this plan and completion of the proposed activities will require a case by case authorization by the RDA and City Council. Public expenditures for projects listed in the plan will be based on the development status of the land and economic conditions existing at the time the project is scheduled for construction. The City Council or RDA is not mandated to make expenditures described in this plan and is limited to implementing only those project cost categories identified. Changes in boundaries or additional project categories not identified here will require formal amendment to the plan involving public review and City Council approval.

As stated in the City Council resolution approving this plan (see attachments), this project plan conforms to the Comprehensive Plan of the City of Stoughton.

Plan of Redevelopment for TID #5

Inventory of Area

The area that is the subject of this plan is in the City of Stoughton, located in Dane County, WI. TID #5 (and the amended RA #1) is comprised of properties west and south of Downtown Stoughton. The area is generally referred to as the "Rail Corridor."

Underutilized, deteriorated, and undervalued parcels and improvements characterize the area. Some of the area consists of industrial/manufacturing buildings, most of which are underutilized, and some of which have gone unutilized for many years. The actual or suspected environmental contamination will limit the redevelopment prospects of much of the area in TID #5 without City involvement in the redevelopment process.

Other areas of the TID contain some of Stoughton's oldest housing stock, much of which needs improvement.

Overall, TID #5's accessible location along Main Street (USH 51) and adjacent to Downtown Stoughton makes it an attractive area to redevelop for the City and for potential developers. The City and RDA intend to use the tools and powers authorized by State Statutes to promote the redevelopment of this area and prevent further deterioration of infrastructure and site improvements. The creation of a Tax Increment Finance District with an overlapping Redevelopment Area will promote further redevelopment and investment from property owners, both within and outside of the district. The creation of the TID allows the City to provide needed infrastructure, as well as funding to local stakeholders through incentives and grants, to encourage business and property owners to proactively participate in revitalization.

The City Council passed a resolution declaring the area blighted on March 11, 2008. 34.5 acres, or 52.3% of real property in the TID #5 boundary is blighted. Table 1 shows an inventory of property within TID #5/RA #1. Map #2 in Appendix A shows the parcels found to be blighted.

Table 1: Inventory of Property within TID #5/RA #1

	Parcels	Acres	Percentage
Blighted Property	35	34.5	52.3% (of real property)
Vacant Property	20	10.8	16.4% (of real property)
Real Property	137	66.0	71.2% (of total area)
Right of Way	--	26.7	28.8% (of total area)
Total Boundary Area	--	92.7	100% (of total area)

** The statutory definition of vacant land is when the land value is greater than the improvement value.*

The entire area is served by City water and sewer service. Electric power is provided by Stoughton Utilities. Public utilities are adequate to serve the District. Other than a limited taxi service for _____ run by _____, Stoughton does not have public transportation.

Redevelopment Plans

The City of Stoughton has completed a Neighborhood Plan for the Rail Corridor area. The Plan was adopted on March 24, 2009. The "Preferred Development Plan" (PDP) created as part of that planning process is included in Appendix A of this document. The land uses proposed in the PDP have been carried over into the Future Land Use Map (Map #4 in Appendix A) for this TID #5 project plan. The sections below discuss the redevelopment vision for the Rail Corridor area that was contained in the Neighborhood Plan, with references to the PDP map. Note that the PDP and the descriptions below are conceptual, and does not preclude quality development that may not precisely fit the descriptions from occurring.

Light Industrial

The PDP shows light industrial to the east of the rail line between Main Street and East South Street. This area is currently occupied by Stoughton Trailers, which owns an approximately 73,000 square foot manufacturing and storage facility along the rail line. The substantial grade difference between the parcel lessens its impact on the adjacent residential to the east, which is on much higher ground. If it is redeveloped or changes hands, this parcel should continue to be used for light industrial activities that have a low impact (as far as noise, odors, etc.) on surrounding residential development.

Commercial Space & Commercial/Industrial Flex Space

There are five new buildings proposed north of Main Street — two are shown as commercial/industrial flex space, one is shown as commercial space, and two are shown as potential live/work buildings (which are discussed in the following section)

The objective in including commercial space and flex space is to maintain employment opportunities within walking distance of existing and new residential development. Historically, the Rail Corridor area has been a source of employment for the City, which should continue. However, the area should transition away from the heavy industrial that developed along the river in the early- and mid-20th century to uses that can take better advantage of the proximity of the Downtown and use the river as an amenity.

The space designated as commercial/industrial flex space could accommodate small existing businesses and start-up businesses, and could also be a good location for a business incubator.

In either case, it should not be home to heavy industries that would generate excessive odors or noise.

The commercial space at the corner of Main Street and Hillside Avenue is envisioned as commercial office and service space. With the high visibility of Main Street, especially coming in to Downtown Stoughton from the Interstate, this corner is ideal for tenants who need a prominent location. Banks, law offices, medical offices, and business offices in general are a good fit for this location. Ancillary services such as a dry cleaner or copy shop may be appropriate for ground-floor space, but retail and restaurant uses should stay concentrated west of the railroad tracks.

Live/Work & Mixed-Use Development

The two buildings along Main Street west of the railroad tracks are designated as live/work units — a mixed-use designation that would have street front retail and services, with owners or employees living above. The location has excellent potential for a business incubator — artists and other craftspeople could live above galleries, storefronts, and workspaces, and sell their products to the public. Such a project would extend Main Street to the east, and build off of the success that the Stoughton Center for the Performing Arts has had across the street. ArtSpace performed a study for the Stoughton Chamber of Commerce that indicated strong interest in a Stoughton location for artists' space. There are three other areas shown on the PDP as "mixed-use development."

Residential

The biggest component of the PDP is residential development south of East South Street. The PDP shows 166 residential units in a mix of townhomes, condominiums, and apartments. The layout is conceptual, and should not preclude alternate layouts that may end up working better after thorough site investigations are done. Also, construction of residential units will depend upon the housing market at the time, and the RDA, Plan Commission, and City may wish to consider well-designed proposals that do not match the exact unit mix or unit locations that are shown on the PDP. What should stay consistent is a mixture of owner-occupied townhomes and condominiums interspersed with apartments — the neighborhood should be accessible to owners and renters of different incomes.

The PDP shows an area designated as Multi-Family residential east of the railroad tracks along East South Street. This area does not show a specific layout or unit count, but should be considered for redevelopment as the land becomes available.

2 Proposed Public Works

TID #5 is being created in order to promote the redevelopment of blighted property, stimulate revitalization, improve a portion of the City, enhance the value of property, decrease crime, and broaden the property tax base. The City and Redevelopment Authority will spend funds on planning, public improvements, demolition of existing structures, financial incentives, and site improvements to promote redevelopment activities.

Costs directly or indirectly related to achieving the objectives of blight elimination or redevelopment are considered "project costs" and are eligible to be paid from tax increments of this tax increment district. The costs of planning, engineering, design, surveying, legal and other consultant fees, testing, environmental studies, permits necessary for the public work, easements, judgments or claims for damages, and other expenses for all projects are included as project costs.

Listed below are major public improvement categories, which are necessary and standard improvements for eliminating blight and promoting redevelopment of blighted areas. Table #2 in Section 3 summarizes total costs by category. Appendix B contains financial attachments which show the estimated timing and financing for proposed public works and TID expenditures.

A. Capital Costs

Including, but not limited to, the actual costs of the construction of public works or improvements, new buildings, structures, and fixtures; the demolition, alteration, remodeling, repair or reconstruction of existing buildings, structures and fixtures other than the demolition of listed historic properties and the acquisition of equipment to service the district.

The City does not anticipate incurring capital costs as part of this project plan. Should capital costs become necessary to accommodate redevelopment, the City may opt to amend this plan in the future.

B. Infrastructure

That portion of costs related to the construction or alteration of sewerage treatment plants, water treatment plants or other environmental protection devices, storm or sanitary sewer lines, stormwater management facilities, water lines, or amenities on streets or the rebuilding or expansion of streets the construction, alteration, rebuilding or expansion of which is necessitated by the project plan for a district and is within the district. Infrastructure can also be installed outside of the district, if required to carry out project plans, but only the portion which directly benefits the district is an eligible cost.

\$2 million is budgeted for roads, streetscaping, and utilities improvements. Upgrades to accommodate redevelopment will likely include extending Main Street streetscaping and amenities east to Hillside Avenue, implementing a riverwalk path, and general street and utilities improvements to right-of-way throughout the district.

C. Site Development Costs

1. Site development activities required to make sites suitable for development including, but not limited to, environmental studies and remediation, stripping topsoil, grading, compacted granular fill, topsoil replacement, access drives, parking areas, landscaping, storm water detention areas, demolition of existing structures, relocating utility lines and other infrastructure, utilities, signs, fencing, and related activities.

2. Site development activities to serve the property such as installation of sanitary sewer, water, storm sewer, natural gas, electric, telecommunications and other utility connections.

\$500,000 is budgeted for site cleanup and demolition costs. Because there are several old industrial properties throughout the district, it is expected that some environmental remediation will be necessary. Building demolition and other activities described as part of #1 and #2 above may necessary as part of remediation, or to prepare a site for redevelopment.

D. Land Acquisition & Assembly

This may include but is not limited to fee title, easements, appraisals, environmental evaluations, consultant and broker fees, closing costs, surveying and mapping, lease and/or the sale of property at below market price to encourage or make feasible an economic development project. This could also include the cost to relocate existing businesses or residents to allow redevelopment.

\$3 million is budgeted for land acquisition and assembly for this TID, which includes all the potential acquisition costs discussed above.

E. Development Incentives

The City may use TID #5 funds to provide incentives to developers and businesses to promote and stimulate new development. The City may enter into agreements with property owners, businesses, developers or non-profit organizations for the purpose of sharing costs to encourage the desired kinds of improvements. In such cases, the City will execute development agreements with the developers and/or businesses, which will identify the type and amount of assistance to be provided.

The City may provide funds either directly or through an organization authorized by Wisconsin Statutes (such as a Redevelopment Authority, Public Housing Authority, development organizations or other appropriate organizations) for the purpose of making capital available to business and or developers to stimulate or enable economic and housing development projects within TID #5. Funds may be provided in the form of a cash grant, forgivable loan, direct loan or loan guarantee. Such funds may be provided at terms appropriate to, and as demonstrated to be required by the proposed economic development and or housing project and shall be set forth in a development agreement.

\$2 million is budgeted for development incentives. This includes \$1.5 million for business development incentives, and \$500,000 for a housing improvement program.

F. Professional Services

Including, but not limited to, those costs incurred for architectural, planning, engineering, and legal advice related to implementing the project plan, negotiating with property owners and developers, and planning for the redevelopment of the area.

\$400,000 is budgeted for professional services, as described above.

G. Discretionary Payments

Payments made, at the discretion of the local legislative body, which are found to be necessary or convenient to the creation of tax incremental districts or the implementation of project plans. This could include expenditures to fund RDA programs to eliminate blight,

improve housing stock, remove social obstacles to development, provide labor force training, day care services, or neighborhood improvements to improve the quality of life or safety of the residents, workers, or visitors and other payments which are necessary or convenient to the implementation of this project plan.

\$900,000 is budgeted for discretionary payments in TID #5. Of the \$900,000, \$300,000 is budgeted for grant matching funds for any grants the City or RDA may apply for to make improvements to serve TID #5. The remaining \$600,000 is budgeted for RDA funds for TID #5, which equates to roughly \$22,000 per year if the TID were to remain open for its maximum life. RDA funds may be used by the RDA for any of the discretionary items described above, or other items such as TID administration and professional services, as described elsewhere in this list of proposed public works.

H. Administration Costs

Administrative costs including, but not limited to, a reasonable portion of the salaries of the City Administrator, Building Inspector, Attorney, Finance Director, Auditor, Assessor, Public Works employees, City Engineer, RDA staff, consultants and others directly involved with planning and administering the projects and the overall District on behalf of the City or RDA.

Approximately \$154,000 is budgeted for TID administration costs, as described above.

I. TIF Organizational Costs

Organization costs including, but not limited to, the fees of the financial consultant, attorney, engineers, planners, community development consultants, surveyors, map makers, environmental consultants, appraisers and other contracted services related to the planning and creation of the TID. This shall include the preparation of feasibility studies, project plans, engineering to determine project costs and prepare plans, maps, legal services, environmental investigations, grant applications, regulatory approvals and other payments made which are necessary or convenient to the creation of this tax incremental district. Also included as an eligible administrative cost is the \$1,000 Certification Fee charged by the Wisconsin Department of Revenue Certification fee.

\$26,000 is budgeted for this item.

J. Financing Costs

Including, but not limited to, all interest paid to holders of evidences of indebtedness issued to pay for project costs and any premium paid over the principal amount of the obligations because of the redemption of the obligations prior to maturity.

Approximately \$3 million is budgeted for financing costs, including capitalized interest costs. The actual amount of financing costs will be determined by the timing of bond issuances and market conditions at the time of issuance.

The projects listed above will provide necessary facilities and support to enable and encourage the development of TID #5. These projects may be implemented in varying degrees in response to development needs. Project costs may be expended up to one-half mile outside the TID #5 boundaries provided that the expenditures benefit the TID. The cost estimates above may be adjusted for inflation at the time they are incurred. Map #5 in Appendix A shows public works that are planned as part of this TID.

3 Detailed Project Costs

Table #2 describes the detailed project costs for project categories anticipated to be implemented during the expenditure period of TID #5. This format follows Department of Revenue guidance on detailed project costs, which states "this list should show estimated expenditures expected for each major category of public improvements."

All costs listed are based on 2010 prices and are preliminary estimates. The City reserves the right to revise these cost estimates to reflect unforeseen circumstances between 2010 and the time of construction or implementation, such as a higher than anticipated inflation rate or financing costs that vary from projections due to market conditions at the time of a bond issuance. The City should pursue grant programs to help share project costs included in this project plan, as appropriate. Planned project costs are listed in the table below. A more detailed list of planned project costs is included as part of the Financial Attachments in Appendix B.

The City may fund specific project cost items shown below in greater or lesser amounts in response to opportunities that will help the City accomplish the purposes of TID #5. The City will generally use overall benefit to the City and economic feasibility (i.e. the availability of future revenue to support additional project costs) in determining the actual budget for project cost items over the course of the TID's expenditure period.

Table #2: City of Stoughton TID #5 Planned Project Costs

Proposed Improvements	Total Cost	Others' Share	TID Share
A. Capital Costs	\$0	\$0	\$0
B. Infrastructure	\$2,000,000	\$0	\$2,000,000
C. Site Development Costs	\$500,000	\$0	\$500,000
D. Land Acquisition & Assembly	\$3,000,000	\$0	\$3,000,000
E. Development Incentives	\$2,000,000	\$0	\$2,000,000
F. Professional Services	\$500,000	\$100,000	\$400,000
G. Discretionary Payments	\$900,000	\$0	\$900,000
H. Administration Costs	\$154,050	\$0	\$154,050
I. TIF Organizational Costs	\$26,000	\$0	\$26,000
Inflation	\$1,909,771	\$0	\$1,909,771
Subtotal	\$10,989,821	\$100,000	\$10,889,821
K. Financing Costs (<i>less Capitalized Interest</i>)			\$5,613,942
Capitalized Interest			\$1,336,042
Total TID Expenditure			\$17,839,805

There are no project costs planned for TID #5 which would directly benefit property outside the TID, therefore there are no "non-project" costs.

4 Economic Feasibility

In order to evaluate the economic feasibility of the TID, it is necessary to project the amount of tax incremental revenue that can reasonably be generated from the district. The ability of the municipality to finance proposed projects must also be determined. TID #5 is economically feasible if the tax incremental revenue projected to be generated over the life of the TID is sufficient to pay all project and financing costs incurred during the TID's expenditure period. The components of such an analysis include:

- A. The expected increase in property valuation due to inflation and the impact of general economic conditions on the TID.
- B. The expected increase in property valuation due to new development encouraged by the TID.
- C. Any change that may take place in the full value tax rate.
- D. The expected TID revenues.
- E. The expected TID cash flow (the *timing* of the revenue).

Following is a discussion of these components. Financing issues are discussed in the next section.

A. Inflation

Throughout the past twenty years, the annual rate of inflation in the construction industry has averaged 2.5 percent (source: Engineering News-Record Construction Cost Index History - <http://enr.construction.com/cost/costcci.asp>). Appreciation of land values in the proposed TID area have been nominal due in part to the number of blighted in the area. The inflation rate, for the purpose of making projections of equalized value, will be 1.5 percent. Inflation for purposes of projecting future project costs is assumed to be 3.0 percent.

B. Increase in Property Value

The proposed plan for TID #5 includes the redevelopment of parcels within the TID (Table #3). The formation of TID #5 will enable the City to provide developer incentives that will stimulate redevelopment in the area. This redevelopment will create increased property valuation. The value of anticipated redevelopment is shown in Attachment #7 in Appendix B. Redevelopment values were estimated using redevelopment scenarios developed in the Rail Corridor Neighborhood Plan.

C. Full Value Tax Rate

The third variable to consider in projecting TID revenues is the full value tax rate (Table #3). The full value tax rate is adjusted annually based on property valuation and the amount of funds required by all taxing jurisdictions to support their adopted annual budgets. The following chart summarizes the historic full value tax rate in the City between 2000 and 2009.

The full value rate has dropped between 2000 and 2009, though the rates for 2008 and 2009 are slightly higher than 2007. For our purposes, the 2009 tax rate of \$18.56 per \$1,000 with a -0.75% change will be used in this project plan to project TID revenues. This mill rate takes into account property tax levies from the School District, City,

Table #3: Full Value Tax Rate

Year	Mill Rate/ \$1,000	Percent Change
2000	0.02275	--
2001	0.02225	-2.20%
2002	0.02160	-2.92%
2003	0.02154	-0.28%
2004	0.02031	-5.71%
2005	0.02027	-0.20%
2006	0.01882	-7.15%
2007	0.01826	-2.98%
2008	0.01843	0.93%
2009	0.01856	0.71%

County, and Technical College. The -0.75% change will provide a conservative estimate since an increase in the full value tax rate would result in an increase in tax increment for the District.

D. TIF Revenues

A projected construction increment of approximately \$69 million (not including inflation) is expected over the life of TID #5. The projected TIF Revenue from TID #5 will be as shown in the Tax Increment Proforma in Attachment #4 of Appendix B. The total tax increment revenue is sufficient to pay all TID related costs for the projects and amounts shown in the Planned Project Costs in Attachment #1 of Appendix B.

E. Cash Flow

Another consideration regarding the adequacy of TID revenues toward paying TID project costs is the relative timing of revenue and expenditures, or cash flow. There are sufficient TID revenues over the life of the TID to pay all costs. In addition, there are sufficient TID revenues in each year to pay all costs. The City may borrow additional funds to pay interest expense on borrowings (capitalized interest) to bridge temporary cash flow gaps caused by the two year lag in collecting tax revenue on new increment. The Tax Increment Cash Flow Worksheet shown on Attachment #5 summarizes the assumed cash flow.

5 Financing Methods & Timetable

A. Financing Methods

An important aspect to consider in assessing the economic feasibility of TID #5 is the ability of the City to finance desired projects to encourage development. Financial resources available to the City include general obligation notes and bonds, revenue bonds, special assessments, and federal and state community development programs.

General obligations of the City are limited by state law to five percent of the equalized property value. As of December 31, 2008 the City had total debt capacity of approximately \$49.1 million and \$_____ in existing General Obligation debt. Using this data, the current remaining debt capacity is \$_____. There is approximately \$11 million in anticipated project costs within the TID. Not all anticipated project costs will need to be borrowed. For example, TID administration costs can be paid out of City operating funds and reimbursed from the TID when funds are available. Other expenses can be paid out of TID cash flow as projects are constructed, assessed, and begin paying property taxes.

The City has the capacity to finance some project costs through direct debt or bond instruments, utilizing the general revenue capacity of the City to secure those instruments. There are other mechanisms available to pay for some project costs that would not count against the City's constitutional debt capacity. "Developer-Financed TIF" is one of these options, where the developer borrows funds that the City would have borrowed under a traditional TIF and is then reimbursed by the City. Another option is for the RDA to issue bonds instead of the City. Both such methods are likely to be used to some extent within TID #5.

The City may also utilize revenue bonds repaid from fees for services charged by the City. Common examples of such revenue are charges for sewer and water usage. There is no statutory limit on the amount of revenue bonds that can be issued; however, the City must demonstrate the ability to repay the debt from anticipated revenues. A further factor that could potentially limit revenues is that utility rates may be regulated by the Wisconsin Public Service Commission.

Some project costs can potentially be paid through special assessments levied on properties directly benefiting from the improvements. Costs of streets, curbs, gutters, and sewer and water extensions are commonly paid through special assessments. The City can issue special assessment bonds, pledging revenues from the special assessments on individual properties to repay the debt. Property owners are generally permitted to pay the special assessments in installments. These bonds are not counted against the City's constitutional debt limit.

B. Timetable

The maximum life of the TID is twenty-seven years; a three-year extension may be requested. The City of Stoughton has a maximum of twenty-two years, until 2037 to incur TIF expenses for the projects outlined in this plan. The City Council and RDA are not mandated to make the improvements defined in this plan; each project will require case-by-case review and approval. The decision to proceed with a particular project will be based on the economic conditions and budgetary constraints at the time a project is scheduled for consideration. Actual implementation of the projects may be accelerated or deferred, depending on conditions existing at the time.

Timing for each of the planned redevelopment projects is shown in the TID Pro Forma (Attachment #4 in Appendix B) and TID Cash Flow (Attachment #5 in Appendix B) worksheets.

C. Financing Methods and Costs to be Incurred

Financing for the projects shown above will be done as shown in the Financing Summary and the Debt Service plans for the borrowing shown in Attachments #2 and #3 in Appendix B. The actual number, timing, and amounts of debt issues will be determined by the City at its convenience and as dictated by the nature of the projects as they are implemented. All monetary obligations will be incurred within the twenty-two year expenditure period, unless relocation requires extending beyond the given period.

6 Overlying Taxing Jurisdictions

Taxing Districts overlying TID #5 in the City of Stoughton include Dane County, the Stoughton Area School District, Madison Area Technical College, and the State of Wisconsin. Impact on the overlying taxing districts is based on the percentage of tax collections in the TID #5 boundary in 2009. Total TIF Increment over the life of the district is taken by the proportionate share from each taxing jurisdiction. An analysis of the impact on overlying taxing districts is included as Attachment #6 in Appendix B.

Many of the projects planned for the TID would not occur, or would occur at significantly lower values, but for the availability of tax incremental financing. TID #5 is a mechanism to make improvements in an area of Stoughton that is experiencing environmental contamination and other blighting influences, and to support growth in the City's tax base. All taxing jurisdictions will benefit from the increased property values, improved public safety, and enhanced community vitality which will result from the projects planned in TID #5.

7

"12% Test"

§66.1105(4)(gm)4.c states that the equalized value of taxable property of the new TID plus the value increments of all existing districts cannot exceed 12 percent of the total equalized value of the taxable property within the municipality. The charts below use values contained in the Wisconsin Department of Revenue's 2009 TIF Value Limitation Report.

Table 4: TID Capacity

Equalized Value	%	Maximum TID Capacity*
\$982,161,800	x 12%	\$117,859,416

* New TIDs cannot be created or properties added to existing TIDs if this level is exceeded.

Table 5: Existing & Proposed TID Equalized Values

Active & Proposed TIDs	Increment
TID #3	\$12,071,800
TID #4	\$6,352,300
Subtotal	\$18,424,100
TID #5, proposed	\$18,296,934*
Grand Total	\$36,721,034

*Estimate.

The equalized value of existing City of Stoughton TIDs is \$18,424,100. \$18,296,934 of equalized value is proposed to be added in TID #5. This adds up to \$36,721,034 or 3.74%. Therefore, the City is in compliance with the statutory equalized value test for TID creation.

8 Changes to Maps, Plans, Ordinances

No changes are proposed in the Master Plan, Official Map, or Building Codes as part of this Plan. The City's Zoning Ordinance and other City Ordinances are required to implement this project plan. Individual redevelopment proposals may require changes in zoning designation consistent with the intent of this Plan. Zoning is shown on Map #6 in Appendix A. There are multiple zoning districts used within the TID boundary. Redevelopment proposals will have to go through the appropriate procedure to receive the proper zoning for their project.

9 Relocation

Although relocation is currently not anticipated, it is possible that it will be necessary to implement projects proposed during the life of TID #5. If relocation were to become necessary in the future, the following is the method proposed by the City or Community Development Authority for displacement or relocation. Before negotiations begin for the acquisition of property or easements, all property owners will be contacted to determine if there will be displaced persons as defined by Wisconsin Statutes and Administrative Rules. If it appears there will be displaced persons, all property owners and prospective displaced persons will be provided an informational pamphlet prepared by the Wisconsin Department of Commerce (DOC). If any person is to be displaced as a result of the acquisition they will be given a pamphlet on "Relocation Benefits" as prepared by the DOC. The City will file a relocation plan with the DOC and shall keep records as required in Wisconsin Statutes 32.27. The City will provide each owner a full narrative appraisal, a map showing the owners of all property affected by the proposed project and a list of neighboring landowners to whom offers are being made as required by law.

10 Promoting Orderly Development

The creation of TID #5 will encourage the revitalization and redevelopment of blighted and otherwise economically distressed and underutilized property in a highly visible location in the City. It will help to promote redevelopment in the City, rather than have development occur on undeveloped sites elsewhere. Creation of the TID will also promote development of the tax base of the City and, in general, promote the public health, safety and general welfare. Successful implementation of the projects planned in TID #5 will build tax base for the City and overlying taxing jurisdictions.

11 District Boundaries

Prior to considering the specific area to include within the TID, the Community Development Authority established criteria to act as guidelines in their work. The boundary criteria are as follows:

1. The equalized value of taxable property of the district plus the value increment of all existing districts does not exceed 12 percent of the total equalized value of taxable property within the City.
2. A minimum of 50 percent of the TID must be a blighted area, in need of rehabilitation or conservation or suitable and zoned for industrial use.
3. All lands within the TID are contiguous.
4. Not more than 25% of the real property within the District has stood vacant for an entire seven (7) year period prior to creation.
